

## Overview

TutorPro LMS v3 was released back in the summer. We have already released a feature update, see details below, and we have another coming before the end of the year! We hope you agree that are some AWESOME features coming?!

### Recently Released

- Updates to the Analytics Dashboard, including the ability to see who hasn't completed those Surveys you've sent out.
- Ability to show your learners who the Event Contacts are on Events and include that information in their Outlook appointment.
- Bulk Import for SCORM, AICC and General Courses.
- Multi-Edit – The ability to multi-edit Courses in the Library to be Inactive, change Categories and Subcategories, change Access and more!
- Each for Learners in the Event > Users, Path > Users, Course > History views, to save trying to locate them in the list.
- Update to the Library for learners to easy see 'New' and 'Updated' courses.

### LMS V3.2.0

Due for release the week commencing December 10:

- Scheduled Reporting – Run your Report, Save and Schedule.
- API – A broad API that will allow you to push and pull certain data from and to the LMS using web methods.
- Additional Sender Emails with the ability to assign ownership to Events, Courses and Paths.

### LMS V3.3.0

Happy 2019! The week commencing March 11, will bring you some more great updates;

- Gamification/Leader boards
- Copy an Event
- Copy a Path

### LMS V3.3.0

The week commencing June 10, we have more features being released including;

- Usage for Certificates and Surveys
- Notifications for Event waitlists
- Preview a Sent email before Resending
- CC Manager functionality on all templates
- Different notifications per Path
- Event and Course Forums
